

SINGAPORE WORKPLACE SAFETY & HEALTH REPORT

Lowest Workplace Fatality Rate Since 2004

Attained WSH2018 Plan's target of a workplace fatality rate of less than 1.8 by 2018

January - December 2017

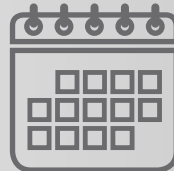

WORKPLACE INJURIES

42 workers were fatally injured, a rate of 1.2 per 100,000 employed persons.

574 workers sustained workplace major injuries, a rate of 16.9 per 100,000 employed persons.

544,687 man-days were lost, a rate of 69 man-days lost per million man-hours worked (i.e. accident severity rate).

11,882 workers sustained less severe injuries (i.e. minor injuries), a rate of 351 per 100,000 employed persons.

1.6 incidents occurred for every million man-hours worked (i.e. accident frequency rate).

DANGEROUS OCCURRENCES

35 dangerous occurrences (DO) were reported.

OCCUPATIONAL DISEASES

799 occupational disease (OD) cases were confirmed, with an incidence rate of 23.6 per 100,000 employed persons.

Leading OD was work-related musculoskeletal disorders (WRMSD) with

337 cases

Second most common OD was noise-induced deafness with

329 cases.

TOP 3 INCIDENT TYPES OF WORKPLACE INJURIES

Severity of Injury	Falls from Heights (FFH)	Work-related Traffic	Struck by Moving Objects	Caught In/ Between Objects	Slips, Trips and Falls	Cut/Stabbed by Objects
Fatal	8 (19%)	7 (17%)	7 (17%)	5 (12%)	-	-
Major	63 (11%)	-	-	60 (10%)	177 (31%)	-
Minor	-	-	1,943 (16%)	-	3,323 (28%)	1,481 (12%)
