

## SERVICE PROVIDERS OFFERING HCP CONSULTANT SERVICES

The Management of Hearing Conservation Programme(HCP) is to establish and implement a comprehensive programme to minimise the risk associated with workplace noise exposure and to prevent NID.

The HCP Gap Analysis checklist is a systematic approach to identify the current gaps in the HCP implemented by each company. The checklist may be performed by a competent person or a HCP consultant, however they would need to have competency in HCP as well as control solutions.

The list below is for reference only and inclusion of companies in it does not in any way imply recommendation, endorsement or warranty of any kind whatsoever on the part of the Ministry of their products/services. It is not exhaustive and will be updated from time to time.
