

Dear Employment Agency Key Appointment Holders,

The Multi-Ministry Taskforce has recently announced several actions to slow down community transmission, including more pervasive testing to detect and ringfence infections in the community early. The frequency for mandatory Fast and Easy (FET) Rostered Routine Testing (RRT) regime has increased from once every fortnight to once a week.

### **Weekly ART for staff working on-site**

2 MOM urges EAs to implement an ART regime for your staff who are working on-site, including EA runners. EAs can consider having staff perform self-swab ART once every 7 days. To encourage employers to put in place regularly testing, the government will be issuing companies eight ART kits per employee working on-site. More details will be made available at a later date.

### **Info on ART kits**

3 Currently, ART kits are available at various community retail pharmacies, general retail shops as well as e-commerce platforms. Please refer [here](#) for the list of authorised self-test kits.

4 For FAQs on the use of ART self-test kits, you may refer to MOH's website at this [Link](#). For further queries, please contact us at [www.mom.gov.sg/efeedback](http://www.mom.gov.sg/efeedback).

5 Thank you for supporting our fight against COVID-19.

Ms Shirley Lim  
Director, Operations  
Foreign Manpower Management Division  
Ministry of Manpower
