NOTE

1. This list is prepared to help occupiers, contractors, employers and employees comply with Regulation 7 (1)(a) of the Factories (Explosive Powered Tools) Regulations.
2. The type approval test was conducted by PSB Corporation, formerly known as PSB and SISIR, in accordance with BS 4078 Part 2: 1989 "Powder Actuated Fixing Systems – Specification for Tools".
3. Explosive powered tool means any explosive powered device from which a projectile may be driven against, into or through any substance by means of an *explosive charge* and includes every attachment or accessory used, adapted or intended to be used with the device.
