

APPROACH TO MANAGING OMICRON VARIANT FOR MIGRANT WORKERS

Studies have shown that the Omicron variant is more transmissible but less severe than the Delta variant.

Fully vaccinated migrant workers infected with the Omicron variant will follow the dormitory recovery program in their dormitory or in a centralised recovery facility.

PROTECT YOURSELF AGAINST COVID-19 (INCLUDING THEOMICRON VARIANT)

Maintain good personal hygiene

Adhere to safe management measures including proper mask wearing

Go for your vaccination or booster shots

Report sick if you are unwell
