*Safety Accountability, Focus and Empowerment

2 Manufacturing and Construction contributed 54% of the fatal and major injuries in 1H2023.

- Injuries in Construction driven by smaller scale works such as Addition & Alteration works, Renovation and Facility Management.
- Injuries in Manufacturing driven by Metalworking industry.

Manufacturing & Construction were leading sectors. Slips, Trips & Falls remained the top cause of major injuries in 1H 2023.

Leading Sectors / Industries

1st Manufacturing

2nd Construction

3rd Transportation & Storage

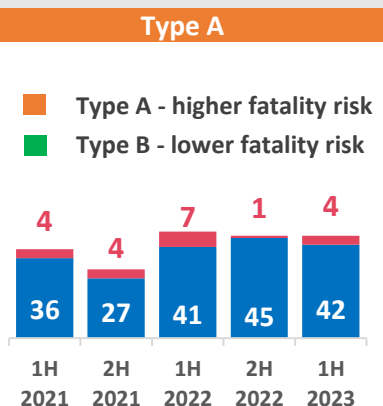

Leading Causes

1st Slips, Trips & Falls

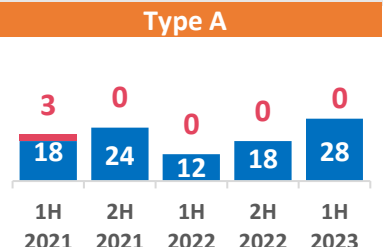

2nd Falls from Height

3rd Machinery Incidents

4th Struck by Falling Objects

Notes:

- [1] Annualised rate is an estimated rate should the current 6-month rate be sustained throughout the year.
- [2] 2023 figures are preliminary.
- [3] Following the amendments to the Work Injury Compensation Act (WICA) which took effect from September 2020, employers need to report all work injuries with any instance of medical leave or light duties. From January 2021, injury numbers shared in WSH Report include injuries with any instance of light duty or medical leave issued. Numbers presented under this new series are marked with [N].
- [4] Since 2022, a new sub-classification for the Incident Type (Cause) of workplace injuries have been introduced to reprioritise the key areas of concern for better interventions. Incident Type (Cause) of workplace injuries will be further classified based on their fatality risks. Refer to Workplace Safety and Health Report Jan-June 2023 for more details.
