

LONG TERM PASS CARD

Long term immigration passes and work passes are issued to foreigners to regularise their stay in Singapore. Currently, these foreigners are issued with a Disembarkation / Embarkation (D/E) card to facilitate their immigration clearance when they enter or leave Singapore.

2 The D/E card is a paper-laminated card which contains essential information (e.g. name, date of birth and Foreign Identification Number) of the pass holder. It does not carry the holder's personal identifiers such as his photograph or fingerprint. The main purpose of the D/E card is to facilitate the immigration clearance of the pass holders when they enter or leave Singapore.

A more secure card

3 The new Long Term Pass (LTP) card is a credit card-sized, durable polycarbonate card that will replace the current stamp endorsement on the travel documents and the paper-laminated Disembarkation / Embarkation (or D/E) card issued to Long Term Pass holders. The LTP card will incorporate fingerprint biometrics and photo image to provide a safe and secure means to facilitate travel and serve as a form of identification.
